## 12. Your recommendations to the teacher for the improvement of the future work.

1. ALL feedback would be important.
2. Teacher could check if the student is present at the distance lesson and not mark unauthorized absences due to uncompleted tasks.
3. I don't just use distance learning, this course is mandatory for me to be able to do the matriculation examination. Otherwise, the teaching was good. I only preferred face-to-face teaching (:
4. Maybe I'm asking too much, but I don't think you get much deeper than the surface very often in distance education classes, in which case I think distance education times should be increased.

## 12. Your recommendations to the teacher for the improvement of the future work.

5. Teacher should consider students from different backgrounds. Some can be very motivated and active even if you don't comment on remote classes or you don't have time for remote classes at the same time as others.

Others may, for example, have work at the time or small children who require immediate care at that moment. Not everyone has a babysitter available. Others learn best from video recordings and by asking the most difficult things.

## 12. Your recommendations to the teacher for the improvement of the future work.

6. Make a clear recording of the day's topics and a separate remote lesson for questions, because others sometimes have to watch the lessons from the recordings and then there may be questions about the assignments.

For an independent student, it is very good that model answers are available in Moodle, because you can't find them in a paper book and then you would get stuck in mind-numbing issues for no reason when you yourself can search for an answer and think first before asking the teacher.

# 12. Your recommendations to the teacher for the improvement of the future work.

7. Now we mainly go through the material in class with the teacher. I think it would be nice to do some tasks together as well.

8. Clarifies some tasks by giving examples.

9. Understands that students do not immediately know what the teachers teach. Teachers should dedicate themselves to teaching more.

10. Keeping in touch with students, which on the other hand can be difficult due to the large number of students.

## 12. Your recommendations to the teacher for the improvement of the future work.

11. The time for e-lessons has been quite limited, and some teachers stick to it strictly, and the so-called asking for advice is not possible live. (other teachers also answer questions during the lesson) I learn best by myself when the teacher teaches and illustrates with pictures, etc. at the same time.

12. Teacher could go through things more slowly and clearly.

## 12. Your recommendations to the teacher for the improvement of the future work.

13. Distance lessons held by my teachers are quite sufficient. I like that they appear and speak in a natural, personable way and expertly. However, even the best distance learning doesn't replace face-to-face teaching, but it's good that there is an alternative.

14. The teacher should announce better the timetables of remote classes and where they are held, less work for the course, e.g. mostly small quick tasks or a few demanding tasks.

**OULU**

## 12. Your recommendations to the teacher for the improvement of the future work.

15. Since the lessons are at least 200 minutes, the courses often fall short unless the teacher himself stretches or does extra.

So, if anything, you could at least cover the topics a little more than superficially, if the teachers could manage to make instructional videos of the course.
